## MISSION PAGE

**Page Title:**

Our Mission

**Pull Quote:**

*“To build a performance environment for traders who are done studying — and ready to execute.”*

**Body Copy:**

You’ve put in the time. You’ve watched the videos, read the threads, built the charts. You understand the concepts — orderblocks, liquidity sweeps, fair value gaps. In theory, it makes complete sense. But when the session opens and price starts moving, something breaks down.

The decision doesn’t come. Or it comes too fast. You enter early, or you miss it entirely. You know what you saw in hindsight but couldn’t act on it in real time.

That gap — between knowing and executing — is not a knowledge problem. It's a structural one.

Most traders never close it because they're still adding tools, not building a system. More concepts, more indicators, more confluences — all of it creating the illusion of progress while the fundamental problem remains: there is no operating framework for when to act, when to wait, and when to walk away.

Braveheart Trading exists to build that framework. Structure, order flow, and the decision-making architecture required to perform under pressure. No shortcuts. No magic indicators. Just the mechanics of how markets actually move — and how to operate within them consistently.

---

## Values & Principles

**Section Title:** Values & Principles

**Subtitle:** The standards we build and trade by — non-negotiable.

---

**Value 1** Icon: structure/grid **Title:** Be Principled **Body:** Trading without principles is just gambling with a chart open. Every decision must be anchored to a rule. Every rule must be anchored to a reason. If you can't explain why, you shouldn't be in the trade.

---

**Value 2** Icon: self/awareness **Title:** Know Thyself **Body:** Your greatest edge is self-awareness. Your psychology, your patterns, your weaknesses under pressure — these matter as much as your setup. The trader who knows themselves executes. The one who doesn't, reacts.

---

**Value 3** Icon: standard/bar **Title:** High Standards **Body:** We don't lower the bar to make trading feel accessible. We raise it so that the traders who meet it can perform at a level that's actually sustainable. Quality over quantity — in setups, in thinking, in everything.

---

**Value 4** Icon: balance/scale **Title:** Balanced Audacity **Body:** Courage without structure is reckless. Structure without courage produces inaction. The professional executes when the model confirms — with conviction, without hesitation, and without ego.

---

**Value 5** Icon: simplify/minus **Title:** Less Is More **Body:** The basics account for 80% of how you trade. Complexity is a trap. We strip away the noise,

reinforce the essentials, and build from there. Simplicity is not a starting point — it's the destination.

---

**Value 6** Icon: shield/error **Title:** Avoid Errors **Body:** Errors of execution — entering without confirmation, moving stops, overriding the plan — compound faster than losses. A professional-grade process eliminates avoidable mistakes before they become habits.

---

**Value 7** Icon: process/cycle **Title:** Process Over Profit **Body:** P&L is a lagging indicator. Build the process correctly and the results will follow. Focus on the execution quality, not the outcome of any single trade.

---

**Value 8** Icon: graph/averages **Title:** Think in Averages **Body:** No single trade defines your edge. Your edge lives in the aggregate — across sessions, across weeks, across market conditions. Evaluate performance over sample size, not individual results.

---

**Value 9** Icon: system/grid **Title:** Trade Systematically **Body:** A framework removes the emotion from the decision. When your model says yes, you act. When it doesn't, you wait. Systematic execution is what separates performance from participation.

---

**Value 10** Icon: alignment/check **Title:** Trade Congruent **Body:** Every trade must align with the narrative, the structure, and the model. If any element conflicts, the trade does not exist. Congruence is the filter that separates A+ setups from noise.

---

**Value 11** Icon: responsibility/anchor **Title:** Trade Responsibly **Body:** Risk management is not a module — it is the foundation. Protect the account. Protect the psychology. A trader who survives long enough to execute consistently wins by default.

---

**Value 12** Icon: growth/loop **Title:** Continuous Improvement **Body:** Mastery is not a destination. It is a permanent loop of execution, review, and refinement. The professional trader is always a student — of the markets, and of themselves.

---

## COURSES / CURRICULUM PAGE

**Page Title:**

The Curriculum

**Subtitle:**

A structured development path. From retail thinking to institutional execution. Three phases. Designed to be completed in sequence. No skipping.

**Progress Labels (top bar):**

ZERO → STRUCTURE → METHODOLOGY → REFINEMENT → MASTERY

---

### Phase I

**Roman numeral:** I **Title:** Foundations **Subtitle:** FROM ZERO TO ONE

**Body:** You've never read a candlestick chart before? Good. We start clean. No assumptions, no jargon, no inherited bad habits. By the end of this phase, you will read price action the way institutions communicate it — in structure, flow, and intent.

**Outcome box:** OUTCOME → You will understand market mechanics, identify institutional behaviour in price, and manage risk with professional discipline.

**Stats:** 15 Lessons · ~12 Hours

**What You'll Learn:** - What a Candlestick Communicates (and What It Doesn't) - Market Structure — The Institutional Language of Price - Risk Management — The Foundation of Long-Term Participation - Introduction to Trader Psychology & Decision Frameworks - Professional Platform & Workspace Configuration

---

## Phase II

**Roman numeral:** II **Title:** Methodology **Subtitle:** BUILD YOUR OPERATING SYSTEM

**Body:** You speak the language. Now you build the toolkit. This phase introduces the core SMC execution framework — orderblocks, liquidity, fair value gaps, and institutional order flow. You will construct a systematic approach to identifying high-probability setups and know precisely when to act and when to stand down.

**Outcome box:** OUTCOME → You will have a complete SMC toolkit and a repeatable framework for identifying, planning, and executing institutional-grade trade setups.

**Stats:** 20 Lessons · ~18 Hours

**What You'll Learn:** - Orderblocks, Breakers & Mitigation Blocks - Liquidity Engineering & Sweep Mechanics - Fair Value Gaps & Structural Imbalance - Multi-Timeframe Confluence & Alignment - Trade Planning, Journaling & Systematic Review

---

## Phase III

**Roman numeral:** III **Title:** Mastery **Subtitle:** REFINE YOUR EDGE

**Body:** You know the model. Now you operate it under pressure. This phase is about performance — live breakdowns, macro context, portfolio management, and the mental architecture required to execute without hesitation. This is where traders separate from participants.

**Outcome box:** OUTCOME → You will develop a personal trading edge — precise, tested, and psychologically resilient enough to execute consistently across market conditions.

**Stats:** 18 Lessons · ~20 Hours

**What You'll Learn:** - Institutional Order Flow & Macro Context - Developing & Testing Your Personal Edge - Live Trade Breakdowns & Real-Time Analysis - Advanced Risk & Portfolio Management - Peak Performance & Consistency Under Pressure

---

## Bottom CTA Block

**Title:** Ready to operate?

**Body:** All three phases are inside the Members Vault. One access point. The complete development path — from reading your first chart to executing with

institutional precision.

### Testimonials

**Marcus T.** | 4 Years Trading | ES Futures *“I spent three years moving between systems with no idea why I kept failing. The Foundations phase gave me a language for what I was seeing. The methodology gave me a framework for when to act. For the first time, I have a process — not a hope.”*

---

**Sarah L.** | 2 Years Trading | Forex (EUR/USD) *“The risk management module alone changed the trajectory of my trading. I was break-even for months, but my drawdowns were compounding losses I couldn’t recover from. Understanding position sizing at the institutional level fixed the fundamental problem.”*

---

**David K.** | 5 Years Trading | Crypto & FX *“Institutional order flow gets thrown around constantly. Here it’s explained with operational clarity I haven’t seen anywhere else. The live weekly breakdowns are worth the membership on their own.”*

---

**James R.** | 1 Year Trading | Nasdaq Futures *“I was looking for an educator who treated this as a profession. No performance marketing. No lifestyle content. Just structure, process, and a serious environment for people who want to improve.”*

---

**Elena M.** | 3 Years Trading | Forex *“The Methodology phase gave me something I didn’t know I was missing: a decision filter. I wake up knowing what I’m looking for. If it’s not there, I don’t trade. That discipline alone has changed my results.”*

---

**Michael B.** | 6 Years Trading | Crypto Spot/Derivatives *“I’ve been in over a dozen communities. This is the only one where the conversation stays professional. No noise, no posturing. Just traders focused on development and accountability.”*

## TOOLS / AFFILIATES PAGE

### Page Title:

The Trading Stack

### Subtitle:

Every tool listed is used daily. No paid placements. No sponsored recommendations. This is the operational infrastructure.

---

**TradingView** | CHARTING & ANALYSIS The industry standard. Clean execution, multi-timeframe analysis, accessible from any device. The only charting platform in the stack. Visit Website →

**Rithmic** | FUTURES DATA FEED Unfiltered tick data for serious futures execution. Low latency. No noise. Institutional-grade feed at a retail price point. Visit Website →

**cTrader** | FOREX EXECUTION Superior execution transparency over MT4/5. The platform of choice for FX. Cleaner fills, better reporting, more honest data. Visit Website →

**Bybit** | DERIVATIVES EXECUTION Deep liquidity on major pairs. Reliable infrastructure for crypto derivatives. Used for active positions, not speculation. Visit Website →

**Notion** | TRADE JOURNALING & DATABASE Every trade logged. Every session reviewed. The database architecture makes performance tracking systematic, not optional. Visit Website →

**Obsidian** | KNOWLEDGE MANAGEMENT A second brain for the serious trader. Local, markdown-based, and built to last. Where frameworks get documented and refined. Visit Website →
